

A group of nine healthcare workers, including doctors and nurses, are standing in a hospital hallway. They are all wearing blue surgical masks. Some are wearing white lab coats, while others are in blue scrubs. They are standing in a line, with some slightly behind others, creating a sense of depth. The background shows the architectural details of a modern hospital building.

Leading Builders of America

Our members include many of the largest homebuilding companies in North America. Our members include publicly traded companies whose shares are traded on the New York Stock Exchange as well as privately held companies.

Our purpose is to preserve home affordability for American families. We do this by carefully evaluating the public policy dialog at the federal and state level and becoming actively engaged in issues that have the potential to impact home affordability.

Our member companies build across the residential spectrum from first-time and move-up to luxury and active-adult housing. In each of these segments, our members are leaders in construction quality, energy efficiency, design and the efficient use of land. Many of our members are also active in urban multi-family markets and also develop traditional and neo-traditional suburban communities. LBA member companies also operate a range of subsidiaries that complement their core homebuilding business including mortgage lending and title insurance.
